MATERICO POLICROMO

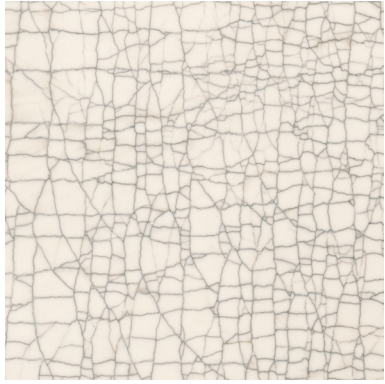

L'effetto policromo è ottenuto mediante la miscelazione di finiture monocromo per un risultato ad alto impatto sensoriale. Si aprono così nuove possibilità creative per i professionisti e per i clienti grazie alle infinite possibilità di abbinamenti in grado di assecondare ogni tipo di esigenza o desiderio. • *The polychrome effect is obtained by mixing monochrome finishes for a result with high sensorial impact. This opens up new creative possibilities for professionals and customers thanks to the infinite possibilities of combinations capable of satisfying every type of need or desire.*
